

## IT 230 Coding Activity Submission Template

**Name:** Christian J. Busca

**Date:** 21125

**Class:** IT 230

**Module:** 1-3 Assignment

1.	<p>Insert a copy of your of the ZIP file of all of your Visual Studio project files here so that it can be loaded and run in another Visual Studio: The zip file is attached to this PDF.</p> <p>Insert here a copy of your *.cs source code text you used here (copy and paste source code here, <u>do not</u> simply insert *.cs files): Attached below, also attached as zip file</p>
2.	<p>Insert a screenshot here of the output that resulted from running your program, showing your last name as the first printed text to the screen: Attached below</p>
3.	<p>Simply followed the reference material in the C# Book designing a WPF application. Also referred to the Microsoft website for additional info. The namespace HelloYourName contains two classes, public MainWindow() which initializes MainWindow.xaml and Okclick which sends the provided text from the MainWindow to the box which is username.</p>
4.	<p>Learned how to design a simple windows application utilizing the reference materials provided. I enjoyed learning hands on using the book as a guide.</p>
